

RAG Course Contents

1.1 Overview

1.2 Offline Flow

1.3 Online Flow

2.1 Query Module

2.2 Query Rewrite

2.3 Query Expansion

3.1 Parsing

4.1 Retrieval

1.2 Offline Flow

.....:1978201801

Offline processing includes:

1. Document store: keep source files
2. Embedding: create vectors
3. Vector DB: build an index

Offline flow runs once or updates periodically.

3.4 Code Example

```
import openai
from sentence_transformers import SentenceTransformer

def retrieve(query):
    embedding = model.encode(query)
    return embedding
```
